

PROJECT QUOTATION

Subscription Content Platform — AI Persona Model

Scope of Work & Commercial Proposal

Prepared For	Prepared By
Client Name: _____	RisoDev · risodev.com
Date: 20-08-2026	Quotation Ref: Q-2026-018

1. Project Overview

A subscription-based content platform where your team publishes exclusive photo and video content to paying members. Members sign up, subscribe to a plan or buy individual content, and access it through a secure paywall. Members can also chat with the persona account and book paid voice and video calls — these are part of the core platform, not optional add-ons. The featured persona is AI-generated and disclosed as such throughout the platform.

The platform is web-based and fully responsive on mobile browsers. It is built on a multi-creator architecture from day one, so the marketplace phase described in your document can be added later without a rebuild.

2. Scope of Work

2.1 Member Accounts

- Email and password signup, Google login, password reset, email verification
- 18+ age gate and confirmation at signup, with consent logging
- Member profile and account settings

2.2 Subscriptions & Payments

- Recurring subscription plans with multiple tiers
- Pay-per-view purchases for individual content and bundles
- Payment gateway integration, auto-renewal, cancellation and refunds
- Payment history and invoices for members
- Revenue and earnings dashboard for your team

2.3 Content Library

- Photo and video upload with albums and collections
- Content locked by subscription tier or individual purchase, enforced server-side
- Adaptive video streaming through CDN — not raw file download
- Blurred preview thumbnails for locked content
- Scheduled publishing at a future date and time
- Signed, expiring media links so content cannot be shared outside the platform

2.4 Chat, Voice & Video Calls

- 1:1 chat between member and the persona account — text and media attachments
- Pay-per-message and message bundle options, with a moderation inbox for your team

- 1:1 voice and video calls, in-browser — no app install required for members
- Availability calendar with paid, bookable call slots and automatic reminders
- Call and chat access controlled by subscription tier or individual purchase

2.5 Admin Panel

- Content upload, scheduling and management
- Subscriber management — search, view history, suspend, ban
- Revenue, subscriber and content performance reports
- Role-based access for admin and support staff

2.6 Compliance & Trust

- Age and identity verification through a KYC provider
- AI-generated disclosure shown at onboarding and on every published item
- DMCA and content takedown request workflow
- Data retention, deletion and audit logging

2.7 Design & Deployment

- Landing page, subscriber feed, content page, chat and call screens, account settings and admin panel
- Mobile-first responsive design, built around your brand assets
- Cloud hosting setup, CDN configuration, SSL, backups and monitoring
- Testing, UAT, documentation, admin training and go-live

3. Project Cost

Description	Amount (INR)
Complete design, development and deployment of the web platform — member accounts, subscriptions and pay-per-view payments, content library with secure video streaming, 1:1 chat, voice and video calling, admin panel, compliance layer, branding, cloud hosting setup, testing and training	₹ 1,95,000
Total Project Cost	₹ 1,95,000

Amount in words: Indian Rupees One Lakh Ninety-Five Thousand Only. Excludes GST and the third-party running costs in Section 7.

4. Payment Terms

Milestone	Percentage	Amount
Project initiation	40%	₹ 78,000
Mid-project demo	30%	₹ 58,500
Final delivery and handover	30%	₹ 58,500
Total	100%	₹ 1,95,000

- Development commences after receipt of the 40% advance.

- Any work outside the agreed scope is quoted separately before it begins.

5. Timeline

Estimated project timeline: 6 weeks.

Phase	Activity
Week 1	Requirement finalisation, UI/UX design, architecture and branding
Week 2	Member accounts, authentication, age gate, admin panel
Week 3	Content library, video streaming, CDN and paywall
Week 4	Subscriptions, pay-per-view, payment gateway, revenue dashboard
Week 5	1:1 chat, voice and video calls, booking calendar and moderation inbox
Week 6	Compliance layer, testing, UAT, deployment, training and go-live

The 6-week schedule assumes timely inputs from your side — brand assets, policy documents, and third-party accounts (payment gateway, KYC, hosting) — and prompt feedback at each milestone. The high-risk payment gateway approval in Section 8 runs in parallel and is outside our control.

6. Not Included in This Phase

The following are in your requirements document but are not part of this quotation. Each can be added later at the fixed price shown — the architecture supports them without rework.

Module	Price if added later
Courses & text content — gated articles, modules and lessons, downloads	₹ 36,000
AI persona pipeline — asset generation workflow and persona consistency tooling	₹ 44,000
Watermarking, Apple login, advanced analytics	₹ 32,000

- Real-time AI chat, synthetic voice and avatar video are not priced here — they are considerably more complex than the items above and would be scoped separately once the platform is live. The chat and calls included in Section 2.4 are between members and your team operating the persona account.
- Native mobile apps, marketing and SEO, content production and ongoing moderation staffing are not included.
- The external-creator marketplace is a future phase. The groundwork is built into this phase; the creator-facing screens are not.

7. Third-Party Running Costs

These are paid by you directly to each vendor, in accounts registered in your name. They are separate from the development fee above.

Service	Indicative cost
Payment processing	~10–15% of revenue, plus a 5–10% rolling reserve
Hosting, CDN and storage	₹ 18,000 – ₹ 60,000 per month, scales with usage
Video & voice call infrastructure	Usage-based (per participant-minute), scales with call volume
Age and identity verification	₹ 90 – ₹ 180 per verification
Email, monitoring, domain and SSL	₹ 4,000 – ₹ 10,000 per month
AI generation credits	As per your chosen tooling and usage

8. Three Points to Settle Before We Start

- **Payment gateway.** Stripe, PayPal, Razorpay and Paytm all prohibit adult-oriented content. A specialist high-risk merchant account is required — CCBill, Segpay or Verotel. Approval takes 4–8 weeks and needs a registered company and business bank account, so this application should be started immediately. Payment work cannot be completed without it, and on a 6-week build it is the single most likely item to gate go-live.
- **Jurisdiction and hosting.** Please confirm where the company is registered, where the platform will be hosted, and which countries it will serve. In India, Sections 67 and 67A of the IT Act, 2000 apply to this category of content. Several other markets now require mandatory age verification. We ask that your legal counsel confirm the position in writing before development begins.
- **Policy documents.** Terms of Service, Privacy Policy and Content Guidelines are to be provided by your lawyer. We integrate them into the platform and build to their specification; we do not draft them.

9. Support & Source Code

- 90 days of free support after go-live — bug fixes, issue resolution and technical assistance.
- Annual maintenance thereafter at ₹ 15,000 per month, covering security patching, updates, monitoring and backups. Optional.
- **Full source code ownership transfers to you on final payment**, along with complete repository, hosting and database access. This is a custom-built platform, not a licensed white-label product — you can host it anywhere and hire anyone to extend it. RisoDev retains no licence or ongoing claim.

10. Acceptance Criteria

The project is considered complete when:

- Member signup, login and age verification are operational
- Subscription plans and pay-per-view purchases process live payments successfully
- Content library, paywall and video streaming are functional
- 1:1 chat, voice and video calling, and paid call booking are operational
- Admin panel, subscriber management and reports are operational
- Compliance layer and AI disclosure are in place
- Branding is applied and the platform is deployed to production
- User Acceptance Testing has been completed successfully

Acceptance & Signatures

By signing below, both parties agree to the scope, cost, timeline and terms set out in this quotation.
